# SEARCH FOR THE

3

# ANCIENT JEWEL

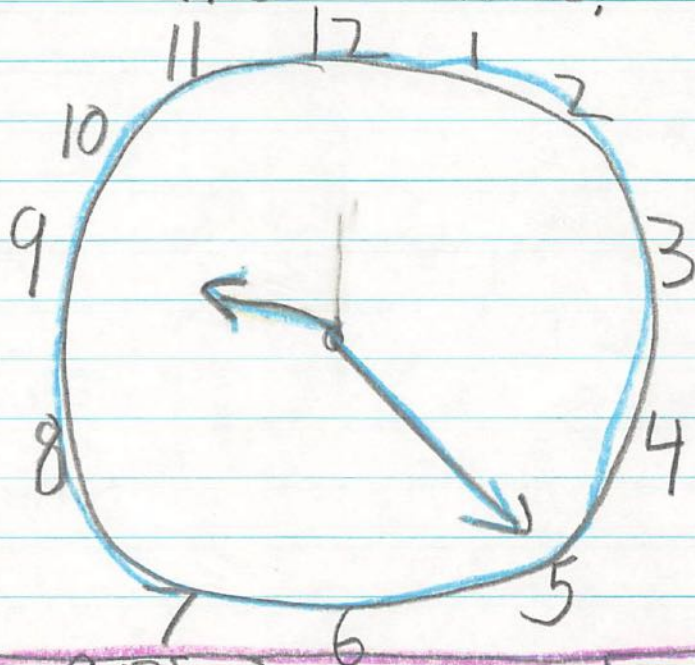

There were 12 warriors, 12  
times more warriors came in.  
How many warriors are there  
now?

144 → Desert  
0 → valley  
24 → Old house

Ancient  
Jewel

oops  
☹

What's the time?

9:25 → Desert  
5:42 → town  
9:20 → warriors

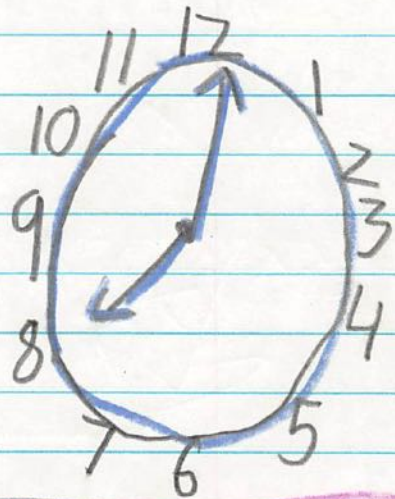

castle

good  
😊

Wha

What's the time?

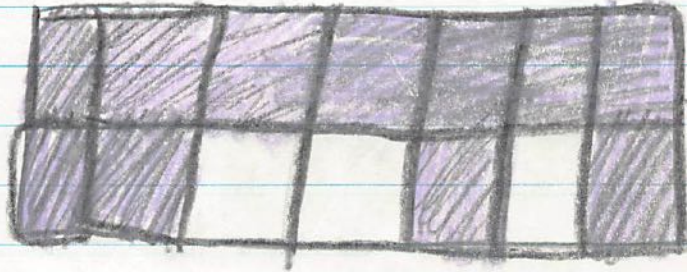

8:00 → Desert  
12:40 → castle  
7:00 →

Cave

good  
☺

What's the Fraction?

---

$\frac{4}{14}$	→	kingdom
$\frac{14}{11}$	→	town
$\frac{10}{13}$	→	Gaurden's

Desert

Oops

Your army of knights had 641 swords. They needed more swords for your knights because they didn't have any swords. They found 461 more swords for them. How many swords do you have all together?

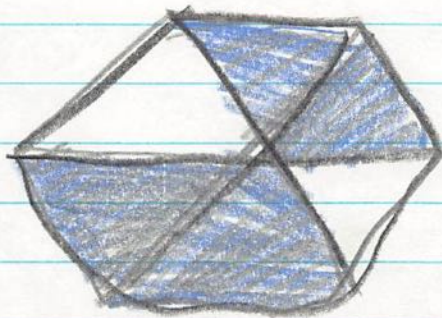

1,102 → knights  
220 → moblins  
2,641 → moa

Forest

oops

What's the Fraction?

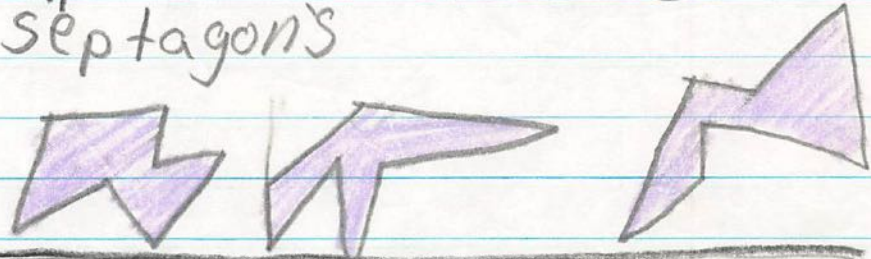

$\frac{6}{4} \rightarrow$  old house  
 $\frac{4}{6} \rightarrow$  kingdom  
 $\frac{3}{5} \rightarrow$  town

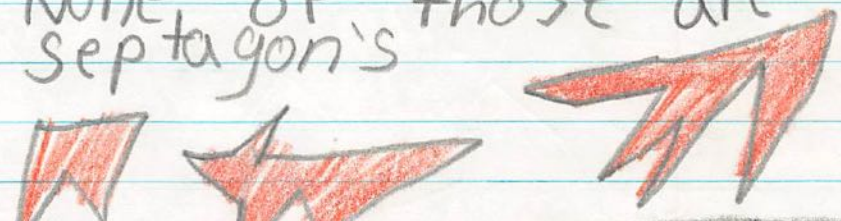

Gaurden's

good  
L  
)

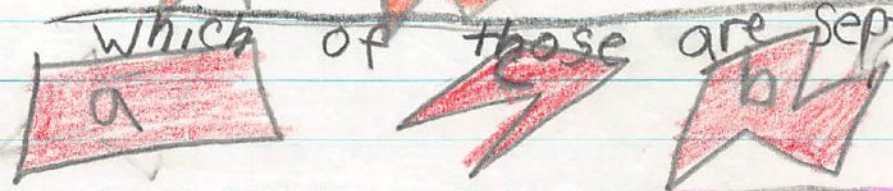

All of those are  
septagon's

None of those are  
septagon's

which of those are septagons

- b → cave
- a → molblin
- c → Parpa  
palace

Kights

✓

Finished

You have finished your Math  
Maze. Count how many oops  
or good cards you got.

If you have no oops you  
finished.

If you have more good  
then oops go to "Desert".

If you have more oops  
then good go to "ancient Jewel".

---

No oops	→ (Finished)
More good than oops	→ Desert
More oops than good	→ ancient Jewel

Kingdom

oops

There were 4,600 molblins  
that can fight you. 2,651 more  
molblins joined in to fight you.  
How many molblins are there  
all together?

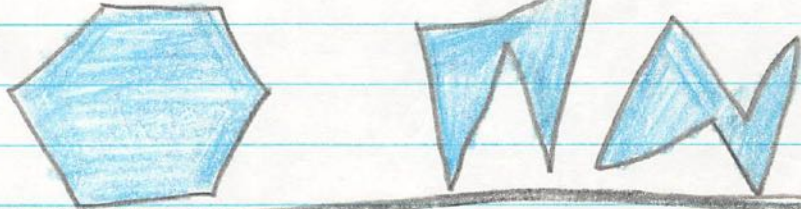

---

1,949 → Pappa Palace  
5,251 → Kights  
1,1600 → Forest

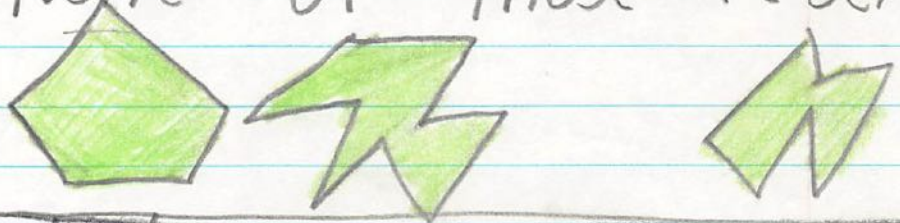

Moa

oops

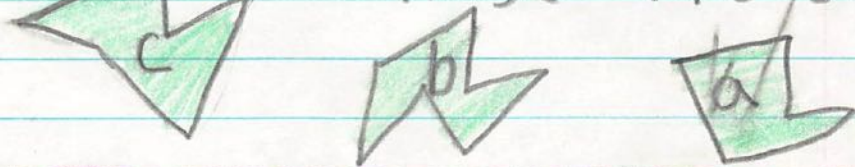

All of those are hexagons

None of those are hexagons

Which of those are hexagons

c → cave  
b → castle  
a → Parpa  
Palace

Molblin

oops  
☹

You had 100 crystal balls that can make you powerful, but it wasn't enough to make you powerful. You were walking, suddenly you see 100 times more crystal balls. How many crystal balls do you have all together?

200 → moa  
20 → valley  
10,000 → Swamp

Old house

Parpa  
Palace

c → malbin  
a → cave  
b → warriors

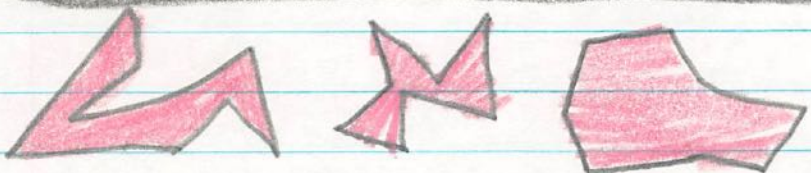

Which of those are octagons

None of those are octagons

All of those are octagons

oops

goods  
←  
U

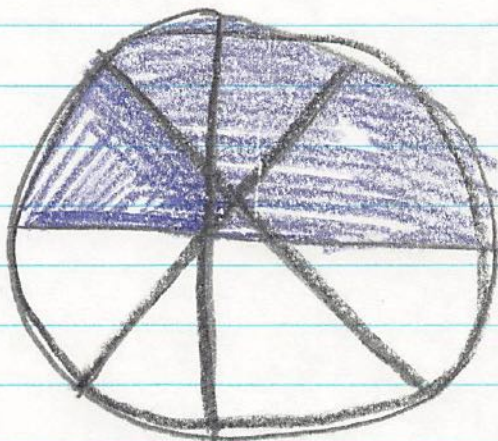

You went to this old man.  
He gave you 800 weapons.  
You said it wasn't enough. So  
he gave you 920 more  
weapons. How many weapons do  
you have now?

1,720 → knights  
1,200 → forest  
280 → moa

Swamp

Oops

What's the Fraction?

---

$\frac{4}{8} \rightarrow$  Kingdom  
 $\frac{8}{8} \rightarrow$  Valley  
 $\frac{3}{8} \rightarrow$  Gaurden's

Town

oops  
^  
^

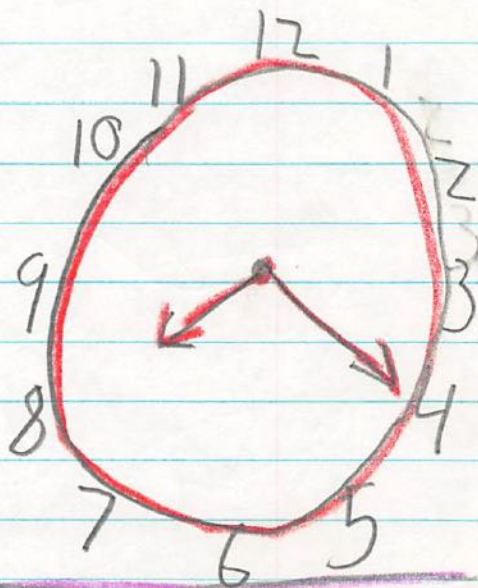

There were 10 iron balls <sup>vs</sup> that you can throw at the warriors. You found 10 more iron balls to throw at the warriors. How many iron balls do you have all together?

0 → old house  
20 → forest  
100 → Swamp

Valley

oops  
^  
^

What's the time?

---

8:20 → Desert  
4:40 → Gaurden's  
8:15 → Castle
